"My name is Mary Veillette and my husband is Raymond Veillette we live in Sun City West. Our phone number is 623-975-2926. I just want to express our support for the Sun Cities Groundwater Savings Plan. It just baffles my mind to think that we might not do that. It is so important and they've already had some subsidence, I believe they called it, over in Sun City and we just have to protect this water situation."

Daniel Bowers, Sun City West, [REDACTED]

"I am calling about this water pipeline. I've been collecting all the articles about it and I am very much against it. Someday we are going to run out of water around here. The idea that we're going to spend all this money to water golf courses just boggles my mind! I see water running in the streets around here. We have to stop wasting water. I especially object to the use of non-potable pipe to bring the water down here because eventually we will need another drinking water source."
